Place: Bengaluru

Phone: +91 8075828518

Email: chethu0705@gmail.com

EDUCATION

B.E – Computer Science
BMS College of Engineering,
Bengaluru
Expected June 2027
CGPA: 7.90/10

Class XII – Science
Narayana PU College, Bengaluru
Karnataka State Board, 2023
Score: 83%

Class X
GEM International Residential
School
ICSE, 2021
Score: 89.20%

CAREER OBJECTIVE:

To secure an internship at Primetrade.ai where I can apply my strong Python fundamentals to develop reliable trading automation systems and build efficient CLI tools for real-time trade execution. I aim to integrate REST APIs, implement robust validation and logging mechanisms, and gain hands-on experience in fintech, crypto markets, and quantitative problem-solving while contributing to innovative AI and blockchain-driven products.

TECHNICAL SKILLS:

Programming: Python, Java, C, C++ (Basic)
Web: HTML, CSS, JavaScript
Database: MySQL, MongoDB
Tools: GitHub, Figma, Unity
Operating Systems: Windows, Linux (basic)
Concepts: Data Structures & Algorithms, Machine Learning, Operating Systems, Computer Networks

CERTIFICATIONS

Machine Learning – Udemy
Introduction to Artificial Intelligence – Infosys Springboard
C Programming – Great Learning
TCS iON Career Edge – Young Professional

PROJECTS

CareEase: Hospital Management System (Oct 2024 – May 2025):
Developed a hospital management system to streamline patient registration, doctor scheduling, and billing. Implemented features for record management and efficient data storage using SQL. Built the front-end using HTML & CSS and implemented backend logic using JavaScript.

AR Navigation for BMSCE (Sep 2025 – Dec 2025):
The AR Navigation App for BMSCE is an augmented reality tool that helps students and visitors navigate inside the college buildings using digital directions overlaid on their device screens. It simplifies indoor navigation by showing real-time paths and markers, making it easier to locate rooms and facilities within the campus.
